

# ossec-remoted

The ossec-remoted program is the server side daemon that communicates with the agents. It runs as ossecr and is chrooted to `/var/ossec` by default.

<b>-c &lt;config&gt;</b>	Run using <config>, as the configuration file.	
	Default value	/var/ossec/etc/ossec.conf
<b>-D &lt;dir&gt;</b>	Chroot to <dir>	
	Default value	/var/ossec
<b>-d</b>	Run in debug mode. This option may be repeated to increase the verbosity of the debug messages.	
<b>-f</b>	Run in the foreground.	
<b>-g &lt;group&gt;</b>	Run as a group.	
<b>-h</b>	Display the help message.	
<b>-t</b>	Test configuration.	
<b>-u &lt;user&gt;</b>	Run as a user.	
	Default value	ossecm
<b>-V</b>	Display the version and license information
