

Roles

You can use these roles to deploy Elastic Stack components, Wazuh API, Wazuh Manager and Wazuh Agents, first clone our [GitHub repository](#) directly to your Ansible roles folder:

```
$ cd /etc/ansible/roles
$ git clone https://github.com/wazuh/wazuh-ansible.git .
```

Below we explain briefly how to use these roles, please check out [Ansible Playbooks](#) for more information.

Contents

- [Wazuh Manager](#)
- [Filebeat](#)
- [Elasticsearch](#)
- [Kibana](#)
- [Logstash](#)
- [Wazuh Agent](#)
