ossec-execd

The ossec-execd program runs active responses by initiating the configured scripts.

-c <config>	Run using <config>, as the configuration file.	
	Default value	/var/ossec/etc/ossec.conf
-d	Run in debug mode. This option may be repeated to increase the verbosity of the debug messages.	
-f	Run in the foreground.	
-g <group>	Run as a group.	
-h	Display the help message.	
-t	Test configuration.	
-V	Display the version and license information	

ossec-execd

-c <config>	Run using <config>, as the configuration file.
